

Light-weight ballistic board

The Celier Aviation Hard Armour Plate board named CAS-B is the lightest range of boards available in this category. Weight has become increasingly important as to manufacture relevant bulletproof doors, furnitures, counter-desks, podium etc. The more the weight is saved the more the mobility of the furniture and its logistics. These type of ballistic boards come in unlimited sizes and special shapes can be tailor-made to the end-customer specifications. These boards can also be used in vehicles, aviation and naval security and they are ready available as stand-alone products.

The CAS-B are able to maintain performance even after being hit by multiple rounds and have been designed to be easily integrated into existing furniture and vehicles etc.

The CAS-B show the same ballistic capability right to the edge of the plate hence maintaining leading edge performance same as our soldiers plates CAS-P.

Product Range:

1. CAS-B2 – Level II Stand Alone Board

Protection Level: Level II NIJ 0101.06

Warranty: 5 years

Weight: 5 kg

Size: 1 m x 1 m

Thickness: 14 mm

Shape: Flat by default.

Description: This high-tech board made from 100% Nano-tubes of carbon, processed under our exclusive patent. Board can be assembled in a manner to create endless surfaces.

2. CAS-B3 – Level III Stand Alone Board

Protection Level: Level III NIJ 0101.06

Warranty: 5 years

Weight: 10 kg

Size: 1 m X 1 m

Thickness: 28 mm

Shape: Flat by default

Description: This high-tech board made from 100% Nano-tubes of carbon, processed under our exclusive patent. Board can be assembled in a manner to create endless surfaces.
