OEG is associated with global well-known brands and is in a position of ability to provide ELV integration services as per the customer's requirements. We cater to a variety of industrial sectors including Hospitality, Healthcare, Real estate, apartments, residential complexes, Villas, and Resorts. OEG focuses on all "ELV" & "ICT" systems to be able to create new infrastructure buildings.

Orion is a leading Systems Integrator and focuses on the Consultancy, Design, Deployment and Maintenance of all ELV (Electronic Low Voltage) systems based on Conventional & IP network switching infrastructure and Blown fibre technologies. Years of hands-on experience enables our ELV Consultants and System Designers to provide immediate suggestions through face to face meetings with our clients ultimately leading to comprehensive turnkey solutions.

Since the technologies in the building industry are more business driven than research oriented, they are also likely to benefit from technological advancements taking place in other areas. OEG prides itself with its achievements during the last few years – as they have ensured the company becomes stronger than ever. These successions are as follows:

- **We have kept our commitment in providing quick, efficient, economical, tailored solutions.**
- **We have maintained our morale of Quality and Perfection when providing solutions to our esteemed Clients.**
- **We have extended our reach to our respected customers to:**

Hotels, Residences, The Corporate & Industrial sectors, Oil fields, Airports, Sea Ports and Government sectors.

With our vision towards becoming a leading system integrator and technology provider, Orion's targets are to provide complete integrated ELV solutions with quality products and services in order to meet the varied requirements. They are as follows:

- CCTV Camera

- Access Control
- Burglar Alarm
- Audio/Video Intercom
- Structured Cabling
- SMA TV
- IP TV
- Public Address/Background Music
- PABX/IPBX
- Home Automation Systems
- Entertainment Systems
